EXPERIENCE

Full-Stack Developer

Servis.ai (formerly FreeAgentCRM)  2022 - 2026

- Designed scalable and reusable React.js UI components using hooks, Context API, and component-based architecture for healthcare, post-production, and mortgage SaaS applications.
- Integrated front-end applications with GraphQL APIs and REST services, orchestrating data across multiple business workflows and third-party systems.
- Developed and maintained Redux-based state management for complex multi-step user interfaces, ensuring consistent and predictable application behavior.
- Collaborated with back-end engineers on API contract design, integration testing, and end-to-end feature implementation in a full-stack environment.
- Implemented authentication and authorization workflows integrated with REST-based identity services, enabling secure user access across healthcare and mortgage platforms.
- Led end-to-end DrChrono EHR integrations for more than four healthcare organizations, developing front-end workflows for automated patient synchronization and appointment management.
- Contributed to the Automation Builder product by developing user interfaces that enabled configuration of emails, tasks, SMS notifications, and cross-application automation workflows.
- Partnered with QA, DevOps, Support, and Product teams throughout Agile development cycles, contributing to CI/CD processes, deployment activities, and customer-facing issue resolution.
- Leveraged AI coding agents, including Claude Code and Pi, to accelerate debugging, component generation, refactoring, and production issue resolution.

Full-Stack Developer

LinkThinks  2021 - 2022

- Built and maintained React Native mobile applications for a B2C fitness SaaS platform, delivering features for workouts, nutrition plans, body measurements, and progress tracking.
- Developed reusable and modular UI components while integrating REST APIs built with Python and FastAPI for secure data exchange and user management.
- Managed application state and navigation flows to deliver a consistent mobile-first user experience.
- Delivered iterative product enhancements in an Agile environment while supporting mobile and back-end application releases.

EDUCATION

Bachelor of Engineering in Computer Systems Engineering

Universidad Autónoma de Aguascalientes, Mexico

 2018 - 2022

SUMMARY

I am a Full-Stack Developer with 4+ years of experience building scalable web and mobile applications using React.js, React Native, Node.js, and Python (FastAPI). I specialize in developing end-to-end features, integrating GraphQL and REST APIs, building reusable front-end architectures, and collaborating across QA, DevOps, and Product teams in Agile environments. I have delivered enterprise SaaS solutions for the healthcare, mortgage, and post-production industries, including DrChrono EHR integrations, while leveraging AI coding tools such as Claude Code and Pi to improve development efficiency, debugging, and code quality.

KEY ACHIEVEMENTS

 Led end-to-end DrChrono EHR integrations for 4 healthcare organizations, streamlining patient synchronization and appointment management workflows.

 Accelerated production issue resolution by leveraging AI coding tools such as Claude Code and Pi, resolving 86% of assigned production bugs and technical support tickets.

 Collaborated with QA, DevOps, Product, and Engineering teams to deliver over 31 end-to-end features on schedule while meeting quality standards.

SKILLS

Soft Skills

Cross-functional Collaboration, Problem Solving, Analytical Thinking, Technical Ownership, Communication, Adaptability, Continuous Learning, Attention to Detail.

Technical Skills

Full-Stack Development, React Development, React Native, JavaScript, Python, TypeScript, GraphQL, REST API Development, State Management, Authentication & Authorization, Debugging, Code Review, CI/CD, Agile Development.

TOOLS & TECHNOLOGIES

React.js, React Native, Redux Toolkit, Angular, Node.js, FastAPI, PostgreSQL, MySQL, MongoDB, Git, AWS CloudWatch, Claude Code, Pi, Java, Amazon S3, TypeScript, HTML, CSS, GitHub.

TRAINING / COURSES

MongoDB Basics
